DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 48-52 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner finds no support in the disclosure for the hammerhead where the hammerhead has **a top surface and at least one nail-retention groove...located on said top surface** and appears to be a departure from the original intent and scope of the claimed invention (see, e.g., page 3, lines 18-29, and page 4, lines 7-10 of the written description).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 48-50, as well as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Kurkjian (2,597,876).

Kurkjian ('876) discloses a hammerhead 10 having a top surface wherein at least

one nail-retention groove 13, 13a is located, the nail-retention groove is dimensioned to releasably accept both a shaft of a nail and a head of a nail, the groove comprises a partially cylindrical nail body groove portion, and a nail-head groove portion contiguous to said partially cylindrical nail body groove portion, wherein said nail-head groove portion has a half conical shape having a top portion and a slanted body portion; and a magnetic component.

Allowable Subject Matter

5. Claims 27-31, 39-47, 53-65 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
